## Utility Operations & Maintenance Best Practices:

What you can do to maximize your funding opportunities

Carrie Bohan, DEC

### Shared Resources

## Shared goals of protecting public health and infrastructure investments by building technical and managerial capacity.

IHS – Indian Health Service; USDA – US Department of Agriculture; EPA – Environmental Protection Agency; SOA – State of Alaska; ANTHC – Alaska Native Tribal Health Consortium ARUC - Alaska Rural Utility Collaborative; TUS - Tribal Utility Support RUBA - Rural Utility Business Advisor; RMW - Remote Maintenance Worker

# **Primary Funding Opportunities**

- Sanitation Deficiency System (SDS)
  - IHS and EPA funds
  - Annual March deadline
- Capital Improvement Project (CIP), Village Safe Water Program
  - State funding system
  - Funding sources are SOA, EPA and USDA

## **Historic Project Scoring**

- Drawbacks to old scoring criteria
  - Most categories were either yes or no; points or no points
  - O&M is the one category where effort by the community can impact the score
    - *BUT*, communities have to know the criteria and be proactive
    - All of the old criteria could be determined without community involvement

## New O&M Scoring Goals

- Develop a tool that can be used for evaluating communities' technical, financial and managerial capacity to own and operate a utility
- Create one set of criteria that could be use for project funding scores and replace the RUBA Assessment
- Establish criteria that reflects "Best Practices" for operating and maintaining a successful utility
- Encourage community involvement
- Offer multiple tiers of points to encourage ongoing, incremental improvements

## New O&M Scoring Criteria

- "Best Practices"
  - Three major categories
    - Technical
    - Managerial
    - Financial
  - More categories to reflect the most important aspects of a successful utility
  - Each criteria has multiple tiers, so a little improvement results in a higher score
  - All scores are 100% within the control of the community

	Category	Best Practice	Poi	nts
		Utility has more than one operator certified to the level of the water system	10
