

Breakout Group Activities

Group 1: Regulatory approaches and risk assessment

Group 2: Technical capacity development to support solutions

Group 3: Social/community acceptance of gray water recycling technologies

Charges to each group:

Group 1:

With respect to health-based performance standards...

- 1) Identify priorities (and who is responsible for or assigned to them)
- 2) Prioritize this list of priorities and discuss next steps for achievement

Group 2:

Discuss household/local/regional/statewide capacity approaches for gray water recycling

- 1) How would they best be managed?
- 2) How would they best be funded?
- 3) How would they best be maintained

List challenges to the above approaches and how these might be overcome

Group 3:

Social Acceptance—list challenges and opportunities

- 1) Can these challenges be overcome? How?
- 2) How can opportunities be implemented?
- 3) Outline an optimal approach to building community acceptance prior to project implementation
